

PIYAS DAS

SAP ABAP Developer | WorkFlow, IDOCs & Enhancement Specialist

✉ piyasdas89@gmail.com | 📞 +91-9064658722 | 📍 Kolkata, West Bengal | 🔗 LinkedIn | 🌐 Portfolio

PROFESSIONAL SUMMARY

SAP ABAP & Workflow Specialist with 2.6+ years building automation solutions bridging SAP IS-U and Salesforce, cutting manual processing by 70%. Skilled in RICEFW development, IDocs, OData, and enhancements, with measurable gains in accuracy and efficiency. Dual SAP certified — Generative AI Developer and Back-End Developer (ABAP Cloud).

CORE TECHNICAL SKILLS

- ABAP Development:** OO-ABAP, RICEFW, Enhancements (User Exits, Customer Exits, BADIs, Implicit & Explicit Enhancements), Data Migration (BAPI, BDC, LSMW), Cross Applications (IDocs/ALE Creation, BAPI Creation, RFCs), Function Modules, ALV Reports, Module Pool, Smartforms, CRM Web UI
- Workflow & Automation:** SAP Workflow Builder (SWDD), Workflow Admin (SWIA, SWI1), BOR/ABAP Object Creation, Event Handling, Agent Determination, Deadline Monitoring, Error Handling, Debugging
- SAP Tools:** SAP IS-U, SAP CRM, S/4HANA, OData Services, CDS Views, BAPIs, RFCs, IDocs (ALE/EDI)
- Platforms:** SAP Joule, IS-U MDT, SPRO, Transport Management, Salesforce-SAP Integration, CRM Workbench

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)
SAP ABAP Developer & Workflow Specialist

Kolkata, West Bengal
Feb 2024 – Present

- Workflow & OData:** Architected 8+ end-to-end SAP Workflows (SWDD) for IS-U processes – triggered via Salesforce API through OData replication, cutting handoff effort by ~70%.
- IDocs & BAPIs:** Designed and implemented end-to-end 6+ IDoc structure from scratch; developed BAPIs and generated ALE interfaces using BDBG, with port configuration via tRFC and executed data migration using LSMW.
- Enhancements:** Implemented 4+ BADIs and Customer Exits to facilitate Move-Out and Move-In contract processing, enabling seamless integration between Salesforce and SAP IS-U module.
- Data Migration:** Executed data migration using BDC, LSMW and BAPI integration for Salesforce transition projects.
- Smartform:** Enhanced Invoice Billing Smartform with dynamic data rendering, barcode integration, logo uploads, page protection, and OTF-to-PDF conversion with automated email delivery, improving output accuracy by ~35%.
- Module Pool Program:** Developed CRM Delivery Notice programs with date/time-bound contract data retrieval and structured output for Business Agreement/BP display, improving output accuracy by ~25%.
- RICEFW :** Delivered 30+ RICEFW objects (Reports, ALV, Function Modules, Idocs, BAPIs, Workflows), reducing manual effort by ~30%; authored 25+ TDDs, cutting rework cycles by ~20%.
- Unit Testing & Monitoring:** Configured deadline monitoring, error-branch handling, and container element mapping across DEV/QAS/PRD; achieved defect-free go-live with ~30% fewer post-production issues.
- Support:** Provided L2/L3 production support — resolved workflow bottlenecks: agent-determination failures, deadline misconfigurations, and debugged Workflow using the SWUS_WITH_REFERENCE tool in live PRD.
- Performance Tuning:** Optimized 13+ ABAP Reports via Runtime Analysis and SQL Trace, reducing batch-job runtime by ~45%.

END-TO-END PROJECT IMPLEMENTATION

Salesforce to SAP IS-U Integration (TCS)

Mar 2025 – Apr 2026

- Led SAP-to-Salesforce migration** for utility contracts, architecting workflows that reduced legacy CRM dependency by ~70%.
- Built 8+ IS-U Workflows** from scratch: Move-In, Move-Out, Switch-In/Out, End/Start of Supply, Internal Start/Stop, with via OData-triggered Salesforce API calls.
- Reduced payload errors by 35%** by optimizing real-time OData services for bi-directional IS-U to Salesforce data replication.
- Achieved near-zero defect go-live** by refactoring 10+ critical RICEFW objects for full Salesforce compatibility.

CRM Price Keys and IS-U Billing Enhancement (TCS)

Apr 2024 – Dec 2025

- Enhanced UI data clarity by 30%** by configuring 42 custom SAP CRM Price Keys via SPRO and customizing visibility/error handling in CRM Web UI.
- Reduced incorrect system triggers by 20%** by building RFC-based CRM-IS-U integrations and modifying custom Workflows with class and BOR methods.
- Automated Master Data Templates (MDT)** by configuring date-bound factors and operands through EPRODCUST.

EDUCATION & CERTIFICATIONS

B.Tech in Information Technology, Kalyani Government Engineering College	2019 – 2023	(CGPA: 8.62/10)
SAP Certified Generative AI Developer, SAP Learning Hub	2026 – 2027	View Certificate
SAP Certified – Back-End Developer – ABAP Cloud, SAP Learning Hub	2026 – 2027	View Certificate
